SUMMARY

Senior DevOps, SRE, and Platform Engineering leader with 8+ years owning CI/CD platforms and large scale cloud reliability across healthcare, banking, and telecommunications. Administers Jenkins, JFrog Artifactory and XRay. Builds automation and Developer Portal plugins (React, TypeScript) and leads SRE/DevOps engineers through Scrum-based operations, incident and change governance, stakeholder alignment, SLO ownership, on-call incident command, and cross-functional delivery. Operates cloud platforms on AWS, Azure, and GCP spanning Kubernetes, Terraform, Vault/CyberArk secrets, DevSecOps, SRE, FinOps, and LLM tooling including MCP and RAG. Delivered 75% infrastructure cost reduction, 142% increase in deployment frequency, and 92% lower MTTR. Supported HIPAA/HITRUST and ONC certification through audit remediation and penetration-test finding closure.

EXPERIENCE

Woundtech, Hyderabad, Telangana

DevSecOps Manager

February 2024 - Current

- Technical lead for a DevSecOps and SRE team of 7 supporting platforms used by ~230 developers, driving hiring, coaching, Scrum operations, standardizing incident, release and change management through SOPs, roadmaps, design reviews, RCA and stakeholder alignment with product and infrastructure, reducing production incidents and MTTR by 92%.
- Reduced multi-cloud spend by 75% (\$504K annually) through capacity planning, Reserved Instances, autoscaling, lifecycle management for ECR, EBS, S3, and RDS, non-production scheduling, cloud budgets, cost governance, centralized logging and Aurora PostgreSQL tuning including cleanup of 4.3B large objects, autovacuum, pg_repack, and reindexing.
- Modernized SDLC with trunk-based development, feature flags, artifact promotion, one-click deployments, reusable and dynamic Bitbucket Pipelines, Playwright automation, Atlassian Forge application for JIRA key validation on pull requests, and AWS CDK TypeScript to Terraform migration, raising deployment frequency by 142%.
- Architected and shipped GenAI platform used by clinicians, integrating Azure AI Foundry and Amazon Bedrock models to generate clinical insights from wound images. Implemented Datadog AIOps with AWS DevOps agent to proactively detect anomalies, accelerate root cause analysis, and reduce operational overhead by 25%.
- Strengthened the DevSecOps platform with Trivy and Talisman in CI/CD, SSO/LDAP, self-hosted NPM registry, AWS GuardDuty, AWS Inspector with EventBridge and SNS, Wazuh SIEM, Cognito, Golden AMI and container image pipelines, patching and backups, penetration testing and SentinelOne remediations, increasing AWS Security Hub score from 83% to 97%, achieving zero critical vulnerabilities, and reaching HITRUST HIPAA and ONC readiness.

KPMG, Bengaluru, Karnataka

Consultant

September 2022 – February 2024

- Established an enterprise observability platform by defining SLIs, SLOs, and SLA reporting. Created Splunk and Dynatrace dashboards to monitor P75 and P99 latency, error rates, and service health, enabling proactive incident detection, improving service reliability, and cutting user reported issues by 20% and improving mean detection time by 35%.
- Led migration of 300+ banking servers for multiple fintech clients from on-premises to Azure. Architected multi-region Amazon EKS clusters with Route 53 failover routing and Kubernetes CronJobs. Standardized Infrastructure as Code with Terraform Enterprise, reusable modules, and Sentinel policy controls to improve resilience, governance, and deployment consistency, sustaining 99.9% SLA.
- Engineered Jenkins, Harness and Azure DevOps CI/CD pipelines with distributed builds, plugin lifecycle, RBAC, audit logging, agent AMI refresh, upgrades with rollback plans, secure secret injection, parameterized Ansible playbook execution and administered Artifactory/XRay. Configured Fluent Bit sidecar logging for Kubernetes workloads, accelerating infrastructure delivery while improving operational visibility and automation across enterprise environments, reducing failed release rollbacks by 30%.

Infosys, Bengaluru, Karnataka

Technology Analyst

December 2020 – September 2022

- Managed 15+ AWS accounts for Fintech clients with banking applications processing millions of daily transactions, led on-premises to AWS migrations, established secure VPN connectivity, enforced cloud governance and least-privilege access, and ran ITIL-aligned incident and change management using ServiceNow across 24x7 production operations.
- Built self-service developer platform and internal Developer Portal plugins in React integrated with platform REST APIs using AWS service catalog and Backstage, used by 130+ developers, cutting infra provisioning lead time by 50%.

- Developed Docker images and serverless applications with AWS SAM, implementing end-to-end monitoring with APM and RUM using Prometheus and Grafana, integrating PagerDuty for incident response automation, and leveraging Amazon SageMaker Notebooks to build and deploy machine learning models, improving application observability and accelerating incident detection by 33%.

Ericsson, Noida, Uttar Pradesh

Integration Engineer February 2018 – July 2020

- Administered AWS infrastructure for a telecommunications platform by designing distributed systems, implementing highly available architectures, supporting Kafka-based event-driven workloads, and configuring disaster recovery using AWS Elastic Disaster Recovery (DRS), achieving an RTO of under 30 minutes and improving resilience for production workloads. Reduced unplanned downtime incidents by 20% year over year.
- Implemented centralized observability using the ELK stack for real-time log aggregation, search, dashboards, and alerting, improving troubleshooting efficiency by 66%.

SKILLS

Cloud: AWS, Azure, GCP, EKS, AKS, GKE, Lambda, RDS, S3, IAM, SQS, CloudWatch, Bedrock, SageMaker, Vertex AI, Azure AI Foundry, FinOps, cost optimization.

Platform Engineering: Kubernetes, Linux, Docker, Podman, Helm, Kustomize, Cilium, Argo CD, GitOps, Istio, Terraform, Terraform Enterprise, Ansible, Python, Go, Bash Scripting, Configuration management, CloudFormation, AWS CDK, Aurora, PostgreSQL, Redis, Kafka, MLflow, Kubeflow, MCP, RAG, ChromaDB, React, TypeScript, Internal Developer Platform (IDP), Backstage.

CI/CD and Release: Jenkins, Bitbucket Pipelines, GitHub Actions, GitLab CI, Azure DevOps, LaunchDarkly, blue green deployments, canary deployments, progressive delivery, Artifactory, Xray, Harness, HashiCorp Vault, CyberArk, Groovy.

Site reliability engineering and Observability: SRE, SLI, SLO, SLA, MTTR, incident management, change management, Datadog, Prometheus, Grafana, Splunk, Dynatrace, New Relic, OpenTelemetry, PagerDuty, ELK, EFK.

Security and Compliance: DevSecOps, SentinelOne, HIPAA, HITRUST, ONC, Trivy, Wazuh, GuardDuty, Security Hub, secrets management, vulnerability scanning, IAM hardening, penetration testing.

Leadership: Engineering Leadership, Stakeholder Management, hiring, Agile, Scrum, Jira, Confluence, DORA metrics, OKRs.

CERTIFICATIONS

- AWS Certified Solutions Architect Associate.
- AWS Certified Developer Associate.
- CKA: Certified Kubernetes Administrator.

EDUCATION

Indian School of Business, Hyderabad <i>Management Essentials</i>	<i>January 2025</i>
Guru Nanak Dev University, Amritsar <i>Post Graduate Diploma in Computer Application</i>	<i>July 2019</i>
Rajasthan Technical University, Kota <i>B.Tech in Electronics and Communication Engineering</i>	<i>May 2017</i>

PERSONAL PROJECTS

Production-Grade MLOps Platform: End-to-end ML lifecycle automation with MLflow, Kubeflow, KServe, DVC across multi-cloud, including deployment, drift detection, and auto-remediation.

Agentic Infrastructure as Code and Chaos Engineering in a secure Kubernetes cluster: LLM-powered Terraform agent and Secure Kubernetes cluster with ArgoCD, Kyverno, Istio, Cilium, OPA and AI driven triage. Executed chaos engineering with Gremlin and K6.

Engineering Intelligence Platform and HPC: CI/CD analytics integrating Bitbucket, Jira, and SonarQube for regressions and AI assisted delivery insights with OpenStack and Slurm for distributed workload scheduling.

Platform Ops Copilot (Agentic AI, MCP + RAG): Extended Kubernetes Incident Copilot with hybrid RAG over runbooks and RCAs using BM25, ChromaDB, and reranking, plus MCP servers for Terraform checks, Kubernetes ops, and CI/CD triggers under audited guardrails to speed RCA and cut MTTR.

AWARDS

Heart Award at Woundtech 2026 | Top Performer Award at Woundtech 2024 | Rockstar Award at KPMG 2023 | Culture Catalyst Award at KPMG 2023 | Public Cloud Professional Award at Infosys 2022
